THE FIRST SOUTHEAST EUROPEAN CONGRESS OF EMERGENCY AND DISASTER MEDICINE

BELGRADE, SERBIA
HOTEL HILTON,
21-23. JUNE 2018.

SECOND ANNOUNCEMENT
Welcome!

"Life is not a problem to be solved, but a reality to be experienced."
Soren Kierkegaard

As the journey of a thousand miles begins with the first step, we now make the first step and start an interesting journey, intriguing and exciting adventure called the The First Southeast European Congress of Emergency and Disaster Medicine, organized by National societies from the South East Europe. The honor to host this Congress belongs to Serbian Society of Emergency Physicians. Although we have many years of experience in organizing congresses, each next step brings something new, something beautiful and exciting. The joy of giving is immeasurable for those ones who donate it out of great love, and just that feeling of joy accompanies us all way along, socializing with you.

Cooperation with our colleagues from the region, with the support of the European Society For Emergency Medicine (EuSEM), has led us to a new project with which we are going to exceed our borders. This big step, The First Southeast European Congress of Emergency and Disaster Medicine, will be held in our beautiful Belgrade, June 21-23. 2018.

With this congress we want to move the borders, so that emergency medicine, in which we have been in love for years, can once again return that love and show itself in the most beautiful light, through wonderful people, our friends. The desire still grows for emergency medicine in our region to get a new dimension in many ways, which will be made especially beautiful and enriched by our socializing in Belgrade.

Another challenge is ahead of us. Looking forward to meet you in Belgrade, on another great event, where we will encounter challenging topics, interesting speakers, quality workshops and the traditionally good companionship to show that we still cherish our common first love - love for emergency medicine.

WELCOME!

20:00 National dinner: SKADARLIJA

Skadarlija is a vintage street, an urban neighborhood and former municipality of Belgrade, the capital of Serbia. It is located in the Belgrade municipality of Stari Grad (Old town) and generally considered the main bohemian quarter of Belgrade, similar to Paris' Montmartre. After Kalemegdan, Skadarlija is the second most visited tourist attraction in Belgrade. Skadarlija is located less than 300 metres (330 yd) north-west of Terazije, central Belgrade. It begins right below the Republic Square and stretches along the short, winding Skadarska Street. One of the most famous streets in Belgrade, it is less than 400 metres (440 yd) long. It connects the Despot Stefan Boulevard with the Dušanova Street, near the Bajloni open greenmarket and the Mira Trailović Square, where it extends into the neighborhood of Dorćol.

TOP TEN: REASONS TO CHOOSE EMERGENCY MEDICINE

10. Because anyone. anytime. anywhere....24/7/365

9. Because you don't choose emergency medicine, it chooses you.

8. Because when you take someone from dying to living in minutes, it's the best job in the world

7. Because no one will have better stories to tell at a friends reunion

6. We're the specialist of the undifferentiated patient & I don't always have to know the definitive diagnosis, I can always risk stratify

5. Because it's another day to heal. Another day to teach. Another day to learn.

4. Because you never know who you will meet or what you will see...no two days are the same! Never boring!

3. Because in Emergency Medicine we have the coolest toys (IO access, ultrasound, videolaringoscopy, etc.,)

2. Because where else does one get the chance to be someone's miracle when they're having the worst day of their lives?

1. Because Emergency Medicine is the most interesting 15 minutes of any other specialties
